ELNIXTM
POWER SYSTEMS
Professionals in Power Systems

ELNIX, since 1995 is the forerunner in power electronics industry, which is going through a 360 change. Our battery chargers are capable to provide longer life of batteries and connecting equipments in it.

ELNIX battery chargers are made with innovative technology, advance design, economy, user friendly, and have been proven in the field more than 15 glorious years.

Our major clients are ISRO, INDIAN RAILWAYS, COCHIN SHIPYARD, INDIAN NAVY, INDIAN OIL, BPCL, HPCL, CIAL, FCRI, MEDICAL COLLEGES ... GENSET OEMs and various builders in India.

DYNA Series ultimate technology

ELNIX - DYNA series battery charger is made for automobile and stationary battery ranges from 20Ah to 80Ah. In this chargers boost and float mode with full charge cut off mode provide maximum efficiency and life of batteries. It is simple, economy and compact in design with ammeter, power on, boost, float and reverse indications with connecting probes.

TECHNICAL

Transformer full wave bridge coupled combinations with ammeter and electronic circuits.

APPLICATIONS

Automobiles, gensets, ups, invertors, solar lamps etc.

DELTA Series perfect in technology

ELNIX - DELTA series battery charger is made for automotive, SMF, VRLA and stationary batteries ranges from 40Ah to 300Ah. In this chargers boost and float mode with full charge cut off mode provide maximum efficiency and life of batteries. It is simple, and compact in design with ammeter, volt meter input mcb, out put HRC fuses. Indications are mains, charger, boost and float.

TECHNICAL

Transformer full wave SCR coupled combinations with electronic circuits Voltmeter, ammeter, out put mcb, input HRC autotrickle boost with DG cut off, indications and more,.

APPLICATIONS

Automobiles, gensets, ups, invertors, solar lamps etc.,.

DELTA Commercial Series specially designed for non stop workstations

ELNIX DELTA commercial series provides an ultimate charger choice for industrial and commercial battery charging purpose, it carries volt selections and current selections with high current and volt generating mode. It is made with transformer full-wave rectifier shunt coupled with high cooling options, with current limiting switch and auto sensing cooling fans.

TECHNICAL

Transformer full wave SCR coupled combinations with electronic circuits Voltmeter, ammeter, out put mcb, input HRC auto trickle boost with DG cut off, indications and more,.

APPLICATIONS

Automobile lead acid batteries, VRLA, tubular batteries and battery plate dry charging purposes.

UNIQUE Series an extreme battery charger

ELNIX UNIQUE series are commercial series, provides magic in battery charging. It's specially made for industrial batteries ranges form 5Ah to 300Ah, connecting 1 to 12 batteries at a time with various current ranges 250mill Amps to 60Amps range with auto volt setting features.

TECHNICAL

Variac controlled transformer SCR coupled combination with electronic circuits Voltmeter, ammeter, out put mcb, input HRC thermal controllers and more,.

APPLICATIONS

Automobile lead acid batteries, VRLA, tubular batteries and battery plate dry charging purposes.
